JR11+ Appointment Evaluation Form for Data Science and Artificial Intelligence

For gray cells, please use the drop-down menus.

Nominee Information

Nominee's name	{candidate}
Assessor's name	{panelist}
Assessment date	10/01/2025

Evaluation

Competency	**Required Proficiency Level**		**Exhibited Proficiency Level**	**Observation / Rationale**
Data Project Design Understand the data science project lifecycle. Effectively manage end-to-end data projects to meet business needs. Make sure to solve the right problems in the right way.	PL2 Define/refine problem statements given a business requirement or question. Manage data projects over the entire lifecycle.		PL0 (not observed)	
Exploratory Data Analysis Explore, understand, and describe the dataset and its provenance. Relate the data to the problem space. Look for patterns, trends, and anomalies in data.	PL2 Develop and test hypotheses. Use advanced data wrangling techniques. Discover insights and identify potential areas for deep-dives. Evaluate the impact of anomalies, biases, and data truncation.		PL1 (remember and apply basic skills, complete routine tasks)	
Data Preparation Collect, clean, impute, validate, label, enrich, augment, featurize, and fuse/integrate datasets to enable robust analysis and/or models.	PL2 Find, ETL, and clean data. Enrich and/or augment data. Construct meaningful new features. Evaluate the impact of data imbalance, data cleaning, etc. to the overall analysis.		PL2 (understand and apply concepts, solve well-defined problems)	
Visualizations & Storytelling Design visualizations to explain insights. Craft compelling data narratives. Contextualize the discoveries. Inform decision making.	PL2 Design and develop clean and comprehensible visualizations. Help users to derive their own insights. Guide the thinking of problem owners and stakeholders.		PL3 (analyze and evaluate multiple approaches, diagnose open-ended problems)	
Statistical Analysis Extract insights and inform decisions by using statistical techniques (e.g., hypothesis testing, data modeling, and significance validation) to robustly identify and validate trends, patterns, and relationships in data.	PL1 Apply common statistical techniques using libraries. Create simple charts and graphs.	PL2 Construct hypotheses, design experiments, perform significance testing. Answer questions or make forecasts.	PL4 (create novel solutions, foresee problems)	1xPL2 *and* 1xPL1 between "Statistical Analysis" and "Machine Learning"
Machine Learning Create a train, test, and validation set. Select/design, configure, train, tune, and evaluate models to predict, describe, or recommend. Deploy and run inference at scale. Interpret results for non-technical end users.	PL1 Use supervised and unsupervised ML models in commonly used libraries.	PL2 Ensure the test set has no leakage. Ensemble, regularize, tune, and evaluate models.	PL0 (not observed)	1xPL2 *and* 1xPL1 between "Statistical Analysis" and "Machine Learning"

Competency	Required Proficiency Level	Exhibited Proficiency Level	Observation / Rationale
Specialization *Non-exhaustive examples:* (Text) NLP, LLMs, MT, IR/RAG, summarization; (Media) OCR, CV, GANs, face ID, video; (Audio) STT, speaker ID, noise removal; (Structured) tabular/nested, quant, geo, time-series; (Graph) SNA, KG	PL2 Perform research, describe shortlisted approaches, benchmark and test, explain choices.	PL2 (understand and apply concepts, solve well-defined problems)	{PL2 specialization}
Community Contribution Influence beyond your area of command. Serve the wider technical community.	PL2 Participate in community-wide initiatives. Represent your team to provide technical assistance or conduct a tech sharing.	PL2 (assist and guide within the team, participate in the community)	

Overall Impression (Shared with candidate)

Please give your feedback about the presentation, the project(s) presented, the candidate's traits/skills, and (if they don't meet the bar) provide suggestions on what they need to work on.

Strengths	• …
Improvements	• …
Additional remarks (if any)	• …

Recommendation (Not shared with candidate)

Nomination recommendation	Yes
Remarks for management (if any)	• …
